The Amara Yad Project: A New Resource for Cardiac Anatomy

JACC Podcast

Play

Introduction (00:00 - 03:00) Dr. Valentin Fuster introduces the focus of the January 28, 2025, issue of JACC on transcatheter tricuspid valve interventions. He emphasizes the growing importance of addressing symptomatic tricuspid regurgitation, a major predictor of morbidity and mortality, and explores potential treatments that aim to improve quality of life and decrease hospitalizations. Transcatheter Tricuspid Valve Repair (03:00 - 20:30) Fuster discusses two key studies: the TRILUMINATE randomized trial and a large European registry. While the TRILUMINATE trial demonstrated significant quality of life improvements using the TriClip device, it did not show a reduction in mortality or heart failure hospitalizations, suggesting the need for longer follow-up in future studies. Meanwhile, the European registry highlights the effectiveness of the Pascal device, showing significant symptomatic improvements and
